

Pdf options

App-wide options

Use the `options` object for app-wide pdf options in `vite-plugin-sveltekit-mathlified`, which you can add in `vite.config.ts` in the project root. The type signature is:

```
interface Options {
  pdf?: {
    engine?:
      | 'pdflatex'
      | 'xelatex'
      | 'lualatex'
      | 'tectonic'
      | 'latexmk';
    documentClass?: string;
    fontSize?: string;
    paperSize?: string;
    classOption?: string;
    includeIn?: {
      header?: string;
      beforeBody?: string;
      afterBody?: string;
    };
  };
}
```
